MEDICAL SYSTEMS

Introducing HealthTrack—A Clinical Information Management and Reporting System

HealthTrack is a comprehensive, yet modular Clinical Information Management and Reporting System, incorporating at its heart - a sophisticated Electronic Medical Record (EMR), Practice Management (PM) and Workflow application.

Designed to streamline and automate the majority of your daily operations, our focus is to improve the productivity and profitability of both doctors and staff in hospitals and specialist private practices
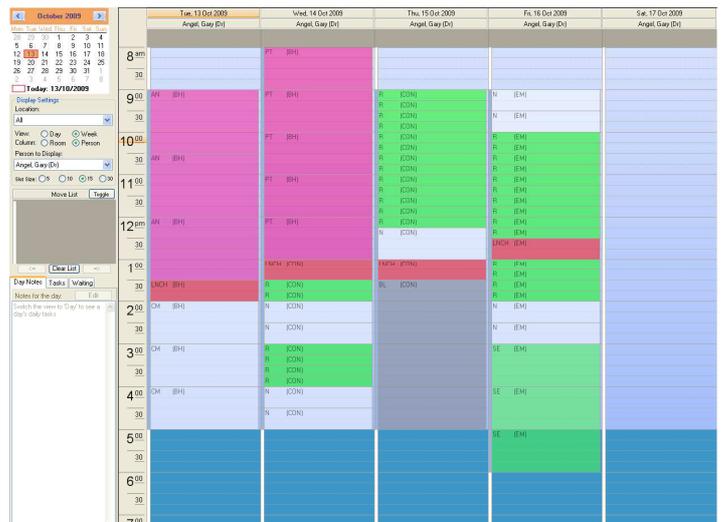

For the Front Office or Practice Manager

The core modules of HealthTrack deliver extensive support for the elementary (day-to-day) functions for your front-of-house Hospital/Practice Management, such as:

- a 3-D perpetual diary
- extensive patient management
- on-line billing
- billing/payments
- general administration
- extensive reporting functions

At the core of HealthTrack is the integrated Electronic Medical Records (EMR) data repository, which is the link between the clinician and practice or hospital and a wide variety of patient records including:

- demographics
- appointments
- letters, email, faxes (templates, pro-forma)
- pathology requests and results
- diagnostic request and results
- complex image management and viewing
- prescribing (medications management)
- all report, email and letter writing are all supported with encrypted transmission

Practice Managers/Hospital reception staff will realize significant improvements in daily operations, providing a better, more streamlined patient experience.

For the Weight Management Clinician

HealthTrack extends its core functionality with a range of integrated modules that are focused on improving the productivity and profitability of various specialist clinical aspects, such as weight management.
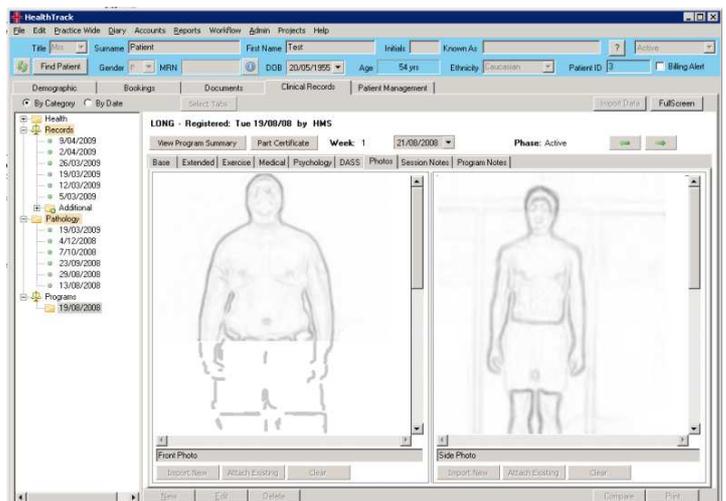

HealthTrack's Weight Management system is a comprehensive clinical management system designed with input from leading experts – to provide in-depth monitoring programs to help patients manage their weight and improve their quality of life.

Support for a variety of weight management functions make HealthTrack one of the most advanced systems available today, including:

- Medical
- Dietary
- Exercise Science and
- Psychology
- Payment Plans

Clinicians can record and monitor a comprehensive range of patient data including:

- Baseline Measurements
- Psychological Analysis (DASS etc.)
- Pathology
- Medications
- Before and After images
- Free form notes

All records and data are saved in the patient's individual file, and all are accessible from within the same application, based on users' security/access privileges.

HealthTrack's innovative recording and workflow processes have improved the efficiency of specialists, allowing them to provide better care for the patients.

HealthTrack delivers a powerful platform for managing clinical records and enhancing your practice or hospital's ability to meet medico-legal audits and comply with local, federal and health department regulatory requirements.

Established market research suggests that HealthTrack can improve a cardiologist's productivity by up to 35-45% delivering a significant return on investment.

HealthTrack can enhance your efficiency, reduce your cost of practice and increase your profitability.

Integration with HL7 Hospitals PAS Systems

HealthTrack integrates with a variety of Hospital PAS (patient administration systems) via HL7 standards for Electronic Data Exchange in Healthcare Environments.

HealthTrack can be deployed within one hospital department or across multiple departments - all sharing the central Electronic Medical Records (EMR) data repository. A shared infrastructure and support process delivers significant cost benefits.

Award Winning Software

The iAwards are Australia's premier awards for the Information Communication and Technology (ICT) industry. They honour the ICT industry's finest companies and their technological innovations.

"HealthTrack's features and functionality are significantly different to all other clinical reporting programs. This enhances the patient care the specialist can provide and improves the profitability of the practice."

"HealthTrack has transformed the way we deliver our service. (...HealthTrack) enables us to deliver a more patient focused & cost effective paediatric cardiac service."

John McNeil (Project Officer)
Queensland Paediatric Cardiology Service
